

As a group, you will be creating a model for nonformal EE program development:

- 1) Introduce yourselves to the others in your group
- 2) Individually, complete a post-it note for each of your brainstormed steps.
- 3) As a group, quickly review all of the post-it notes.
- 4) Create a model of a nonformal program development process. Remember that program development is not necessarily a linear process. You can draw relationships.
- 5) Be creative.
