

Acknowledgements

The Project Team could not have pursued this work without the support of our funders. The United States' National Science Foundation (NSF) awarded the North American Association for Environmental Education a grant (#1033934) for *Developing a Framework for Assessing Environmental Literacy*. In addition, funding from the National Marine Sanctuary Foundation enabled us to inform hundreds of people about our work and its implications via a live event at the National Press Club in Washington, D.C. and a simultaneous webcast on December 1, 2011.

We sincerely appreciate the interest and encouragement of our NSF program officer, David B. Campbell, and the support of our partners at the Organization for Economic Cooperation and Development (OECD) Indicators and Analysis Division and at the National Oceanic and Atmospheric Administration (NOAA) Office of Education. We also thank the project's external evaluator, Joe Heimlich, Ohio State University Extension, for his dedication to the project and the formative insights he provided throughout the project.

Seventeen experts brought their diverse perspectives to the project's July 14 - 15, 2011 workshop and subsequently reviewed our drafts. We thank all of them for their many contributions.
