

WHAT PEOPLE ARE SAYING ABOUT THE FRAMEWORK TO ASSESS ENVIRONMENTAL LITERACY

"If you were unable to catch the live webcast about the development of the Framework to Assess Environmental literacy- it was a powerful statement on how important it will be to assess environmental literacy. Experts from both inside and outside the field of environmental education agreed that it was a critical next step and highlighted the importance of using environmental literacy as a context to assess 21st century skills like problem solving and critical thinking. ... It's exciting progress for environmental literacy!!!"

Katie Navin, Executive Director, Colorado Alliance for Environmental Education

"I think the project was a paradigm changer that hasn't been fully realized by mainstream education. We need to be measuring something more integrative and actuated. Just listening to the webcast made me think differently as a practitioner. Congratulations to you for your initiative and contribution to the field with this project. I was proud for the field and proud of you!"

Lisa LaRocque, Intercambios

"Kudos to NAAEE, NOAA and NSF for an informative and comprehensive EL assessment launch! ... I would like to share this event with my board and with members of Idaho's environmental literacy coalition."

Kristin Fletcher, Executive Director, Idaho Environmental Education Association (IdEEA)

"U.S. Department of Education Green Ribbon Schools applauds the North American Association for Environmental Education and its partners for their work in developing the much needed Framework for Assessing Environmental Literacy. ...the framework will help to address the need to reliably measure and determine progress when assessing both environmental education and green schools."

Andrea Suarez Falken, Special Assistant/ Acting Program Manager
U.S. Department of Education Green Ribbon Schools
