Registration for the April 9 "**Greening Our Faith Communities**" Conference is now open.

Why attend? Does your faith community want to move forward with 'walking the walk' about climate change by lowering the carbon footprint of your buildings and households? This workshop will give you lots of hands-on advice from experts and other congregations' experiences.

Diverse faith communities from around New Hampshire will share their greening success stories (including financing, project management tips, solar projects and more). We will also have experts speaking on these topics:

- **Energy Audits and Carbon Footprints:** What are they, how to get them, and how to use their results.
- **Solar power:** Is it right for your building? What are the options? How to pay for it?
- **Energy Efficiency** through lighting upgrades, insulation, stopping infiltration, etc
- **Beyond Greening Our Buildings:** How to engage your faith community in greening our households

Join us in-person or on Zoom!

Cost: \$25 for in person / \$15 for Zoom

Registration includes individual NHIPL membership.

Lunch is included in in-person cost.
